Dental Implants from *	<b>£435</b>
Root Canal treatments from	<b>£197</b>

\* Depending on number of units

There are many different implant systems available which can all deliver a reliable form of treatment. A dental implant is a substitute for a natural root placed into a socket drilled at the location of the intended tooth.

A dental crown is a tooth-shaped "cap" that is placed over a tooth – covering the tooth to restore its shape, size and strength, and/or to improve its appearance. The crowns, when cemented into place, fully encase the entire visible portion of a tooth that lies at and above the gum line.

# SHOULD I STAY or SHOULD I GO?

We would like to help Susan and you on hand of your treatment plan to make the decision if you should have your dental treatment in London or Budapest.

Susan has a **treatment** plan for **London** and **Budapest**.

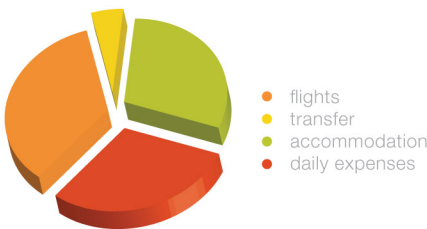

The treatment would cost her **£8931 in London** and **£6654 in Budapest**. But this all? Which other costs should she take in consideration when she is planning a budget solution for her Budapest stay?

**First and Second trip** to Budapest 2 times **3-5 days stay** (depending on T.P.)

3-5 days accommodation	(about £50/day) × 2 = £300-500
two return flights	about £600
London flight transfer	£30-40 × 2
daily spendings in Budapest	about (£ 50-60/day) = £500 - 600
<b>TIGHT BUDGET SOLUTION</b>	about <b>£1560-1780</b>

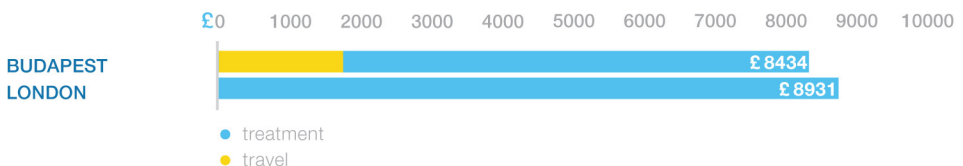

## Travel expenses

After counting all these which expenses has to Susan count with?

Budapest		London	
TP cost	£6654	TP cost	£8931
First trip	£670-890		
Second trip	£890		

We hope showing you these calculations you and Susan will have it easier to decide depending on your needs and possibilities where you would like to have your treatment done.

# TERMS & CONDITIONS

## Pay as You go System:

We ask our patients to pay for treatments as and when they have been completed (except for deposit for treatments). This also means that any preparation or laboratory work has to be paid when it is completed.

For example, the work to fit a crown consists of:

- Preparation of the tooth
- Impression for laboratory work
- Preparation of the crown in the dental laboratory
- Fitting of the crown
- Cementation of the crown

These can be completed in at least two appointments.

In the example above, we would ask our patients to pay 2/3rds of the total price for the procedure to cover the cost of the preparation and laboratory work, even if the price of the actual crown is indicated only in the last visit.

## Guarantees:

Our clinics provide a minimum 3 year guarantee on medical treatment and restoration work and between 5 and 10 years on dental implants, but only on the actual product.

<b>Filings:</b>	3 years
<b>Prosthetics:</b>	3 years
<b>Surgery:</b>	3 years
<b>Implants:</b>	5-10 year guarantee (only for the product which is provided by the manufacturer)

Forest & Ray will offer the half yearly check-up in London, whether the work was done in their clinic there or in Budapest. If any other agreement or contract has been signed (for example: a contract regarding further payment by instalment; or an extended guarantee package with long-term instalment payment method has been accepted) then the terms of that guarantee will apply and take precedence over this.

The half year check-up is free, but any treatment suggested or recommended by the dentist during the free consultation which relates to the dental work previously undertaken by Forest & Ray, should be accepted by the patient so as not to invalidate the guarantee.

The dentist's instructions, recommendations or proposals should be accepted by the patient and carried out. If you fail to accept these recommendations or proposals and / or do not comply with instructions relating to your dental care, you may invalidate the guarantee on the work.

However, in the case of periodontal problems and particularly after periodontal treatment, we generally advise that the patient should have a check-up at least 2-3 times a year.

This is only an extract of our guarantee terms and conditions. A complete list will have been sent to you via e-mail and will be given to you before starting your treatment via e-mail and printed form.
